Guidelines for the Disposal of Waste by Landfill	Botswana	Community burning	The document provides guidelines on landfill selection site, building, management and various types of waste. There is a section dedicated to Hazardous waste and categories of waste that can not be burnt but there are guidelines/code of practice on burning small quantities of Domestic Waste alongside types of landfill where burning is permissible.	http://www.gov.bw/globalassets/mewt/dwmpc/guidelines-for-the-disposal-of-waste-by-landfill.pdf	22-12-18
Botswana's environmental policy on recycling	Botswana	Recycling	The paper looks into recycling activities carried out by two major companies in Gaborone city, Botswana, highlights the level of recycling activities occurring at the Gaborne landfill site an also the role of Non-Governmental Organisations especially Environment Wath Botswana in the waste management sector.	http://ubrisa.ub.bw/bitstream/handle/10311/378/Ketlogetswe2005EnvPolicy.pdf?sequence=1	23-12-18
Instruments for Sustainable Waste Management in Bostwana	Botswana	Recycling	The information highligts current waste management instruments sch as regulatory measures, service levy etc. which are not far reaching hence suggests alternatives such as solid waste collection and disposal fees and depoist return schemes.	http://wasteportal.net/en/africa/botswana	23-12-18
The Botswana Recycling Guidelines Advice on Valorisation for Middle-Income Countries	Botswana	Recycling	The guideline presents a number of institutional, policy, legal and financial reforms which works towards achieving a high performing recycling system in Botswana	http://www.waste.nl/sites/waste.nl/files/product/files/rgd_botswana_vol_1_final.pdf	21-12-18
Hazardous and toxic waste management in Botswana: Practices and Challenges	Botswana	Stakeholder's involvement	Botswana lacks a systemic regulatory framework regarding monitoring of hazardous and toxic waste. A lack of an integrated waste management system has posed various challenges such as lack of cooperation amongst stakeholders about safe management of hazardous and toxic waste.	https://journals.sagepub.com/doi/abs/10.1177/0734242X14556527#articlePermissionsContainer	23-12-18
E- Waste Project- Final Draft Report	Eswatini	Waste collection, Recycling	The objective of the study is to assess the e-waste management landscape in Eswatini, help relevant Authorities better understand the situation which would help in determining the measures to ensure environmentally sound management of e-waste	http://www.basel.int/Portals/5/download.aspx?d=UNEP-CHW-Workshop-Swaziland-Report-20171212.French.pdf	23-12-18
Waste Regulations 2000	Eswatini	Waste collection, Recycling	waste regulation law	https://www.elaw.org/content/swaziland-waste-regulations-2000	24-12-18
Environmental and health impact of solid waste disposal at Mangwaneni dumpsite in Manzini:Swaziland	Eswatini	Waste collection	The research paper explores the environmental and health impacts of waste disposal at a dumpsite in proximity to human settlements .	https://www.researchgate.net/publication/267857256_Environmental_and_health_impact_of_solid_waste_disposal_at_Mangwaneni_dumpsite_in_Manzini_Swaziland	24-12-18
The Green Schools Project, Swaziland	Eswatini	Recycling	The Green schools initiative is a project adopted to ensure that schools in Eswatini inculcate elements of environmental sensitivity and promote environmental sustainability	https://www.deutschland.de/en/the-green-schools-project-swaziland	24-12-18
Ngwenya Glass	Eswatini	Recycling	A company that deals in making products from only recycled glass-mainly from old cool drink bottles. Products include a range of tableware, drinking glasses, vases, jugs and ornamental African animals	https://ngwenyaglass.co.sz/recycling	24-12-18

Launch of Pilot on decentralised waste management in Matsapha Town, Swaziland (eSwatini)	Eswatini	Recycling	The first decentralised waste management pilot was launched in the Matsapha Town, starting with 200 households in the Mweni housing area of the town. The project is a step towards achieving the development goal of making the country a zero landfill nation by 2022. It is estiated that the project will have the council see savings over 5 million Emalangeni	https://www.cseindia.org/launch-of-pilot-on-decentralised-waste-management-in-matsapha-town-swaziland-eswatini--8957	24-12-18
Environmental Policy, Practice and Education in Swaziland Industries: Challenges and Prospects	Eswatini	Recycling	The study suggests that non-compliance of industries with environmental legislation is as a result of lack of environmental expertise and knowledge, suggesting a need for an environmental education programme for industries.	https://www.ajol.info/index.php/sajee/article/download/122666/112210	24-12-18
Swaziland 2 Mbabane Dry Sanitation and Waste Management Project (2014-2016)	Eswatini	Circular management	The goal of the project is improve sanitation and waste management in the three project communities (Mangwaneni ja, Mnyamatsini, Malagwane). In the course of the project trainings are organised on Sanitation, Waste Management (reduce, reuse and recycle) and graywater reuse. Women and girls' participation in trainings, youth groups and decision making is emphasized. The project is a coalition of University of Eswatini, Green Living Movement Eswatini, the Turku University of Applied Sciences and the City Council of Mbabane.	http://www.huussi.net/en/activities/on-going-projects/swaziland/	24-12-18
Adoption of decentralised waste management systems in Swaziland	Eswatini	Household sorting	The main objective of the project is to achieve 100% source separation of waste whereby wet waste is composted and the dry waste is recycled. Centrefor Science and Environment proposes to work with Eswatini Environment Authority and one of the town councils to set up a decentralised waste management pilot for 100 households. The report provides information on specifications of different composting models and the economies of the model.	https://www.cseindia.org/content/downloadrepor ts/8984	25-12-18
Swaziland Environmental Authority: Recycling Pilot Project in Mbabane Main Report	Eswatini	Household sorting	As a result of the lack of formal or public recycling schemes operating in Eswatini, private and informal recycling predominantly exists for commercial facilities and landfill scavenging respectively thus there is the need for a framework. The pilot project tests the effectiveness of a buy-back centre and a drop-off centre approach to serve as a means to recovering post consumer packaging and paper waste	http://www.sea.org.sz/documents/rec-mainreport.pdf	25-12-18
Pigg's Peak Town Council Final Draft Integrated Waste Management Plan	Eswatini	Waste pickers, Scavengers	The report is compiled to depict the essence of having an integrated waste management plan and improvement in the current waste management systems in Pigg's Peak Area. The management of hazardous waste is left out in this plan as collection and transportaion of hazardous waste is not handled by Pigg's Peak Town Council.	http://www.piggspeak.org.sz/publications/IWMP/IWMP.pdf	25-12-18
Laboratory Waste Management Guidelines	Eswatini	Household sorting	The document provides explicit waste management guidelines for handling waste being generated in a laboratory environment	http://www.gov.sz/nw17/images/Health/swazilaboratoryguideline.pdf	25-12-18

Yolo Compost Tumblers Now Available in Swaziland	Eswatini	Composting	Composting tumblers to aid composting of organic waste in homes	http://www.yolocolours.co.za/green/yolo-compost-tumblers-now-available-in-swaziland/	26-12-18
Waste Generation and Management in Lesotho and waste to clay recycling: A Review	Lesotho	Waste collection	The paper examines major industries in Lesotho and the waste generation associated with these industries whilst exploring innovative ways for which these waste streams can be incorporated in the production of clay bricks	http://www.journalrepository.org/media/journals/BJAST_5/2015/Mar/Hapazari822014BJAST11224.pdf	26-12-18
National Healthcare Waste Management Plan	Lesotho	Waste collection	The guidelines are presented to form as best practictices for the handling of healthcare waste in Lesotho	http://documents.shihang.org/curated/zh/413701468054237693/E209301Revised1an0report0Box338878B.doc	26-12-18
Innovative Partnerships for Solid Waste Management Project in Lesotho	Lesotho	Waste collection	The main goal of the project is to support the development of financially sustainable and innovative public private partnerships (PPPs) for basic service delivery in sustainable waste management (including waste collection, street sweeping, waste picking and recycling services) within urban and peri-urban areas in the City of Maseru, Lesotho	https://info.undp.org/docs/pdc/Documents/LSO/Terminal%20Evaluation%20Report%20final%20-%20PPP-ISWM.doc	26-12-18
Economics of Public Service Delivery: Solid Waste Management and Income Generation	Lesotho	Waste collection	The main goal of the project is to support the development of financially sustainable and innovative public private partnerships (PPPs) for basic service delivery in sustainable waste management (including waste collection, street sweeping, waste picking and recycling services) within urban and peri-urban areas in the City of Maseru, Lesotho	http://www.waste.nl/en/product/ppp-iswm-initiative-in-lesotho	26-12-18
Urban Poverty Reduction through Municipal SolidWaste Management: A Case Study of Maseru and Maputsoe in Lesotho	Lesotho	Waste collection	The aim of the research is to generate data and information that would be useful for designing appropriate and sustainable waste system in Lesotho. The systems that would improve the delivery of solid waste management services , increased community participation and job creation hence contributing to economic growth, environmental an health benefis for the people of Lesotho	https://researchspace.ukzn.ac.za/handle/10413/5044	26-12-18
The Selection of Transfer Locations For Maseru Municipality	Lesotho	Waste Pickers	The study is aimed at identifying suitable sites on which solid transfer stations can be located as Maseru Council is constructing a sanitary landfill. The model is developed by using Geographical Information System and Multi Criteria Decision Method to choose an appproprite location. Some of the criteria used include topography, land use and distance from road and rivers, at the end of the study only two sites were found to meet all criteria.	https://core.ac.uk/download/pdf/39666190.pdf	26-12-18
The Identification of Environmentally Sound Technologies for Healthcare Waste Management in Lesotho	Lesotho	Community burning	The paper explores identification of environmentally sound technologies that minimises the risk of infections from healthcare in rural clinics. WasteOpt was applied in identifying environmentally sound technologies in relation to theinfection risks and cost of technologies.	https://repository.up.ac.za/bitstream/handle/2263/24551/Complete.pdf?sequence=5	26-12-18
